

# **Hominid Evolution Module**

**Berlin and Berlin, Fall 1998**

This module introduces introductory students to the major anatomical trends in hominid evolution through close observation and comparison of hominid and ape casts, and to understand these anatomical adaptations in their historical, phylogenetic, and environmental context.

## This module contains:

TA Instructions

Student handout master

Laminated skull labels

Laminated Station labels and descriptions for 5 stations

## Additional materials:

Skull and other casts in white cabinet

## Advanced Preparation

**Be familiar with casts and other material**

**Set up stations with corresponding labels**

**Print student handouts**
